English: Types of Noun

Topics – Maths: All 4 Operations

Hints: Use the method you are most comfortable with for the mathematical operations. I prefer the fastest methods: column addition/subtraction, standard multiplication and short division.

A noun is a word used to identify people, places or things. A proper noun is the name of a person, place or organisation. An abstract noun is something you can't see, hear, touch or physically use. A collective noun refers to a group of people or things. Concrete nouns are things you can see, touch, smell or hear. Bear in mind that some proper nouns are also concrete nouns. If there's a word you don't understand, you can always go and find out!

Monday

- 1) a) Find the difference between 6,008 and 927. Answer: _____
- b) Calculate 762×7 Answer: _____
- c) Calculate $3,087 \div 4$ Answer: _____
